DETAILED ACTION

Specification

The amendment filed September 25, 2008 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "is not attached to the kettle part by means of a hinge and wherein the lid" (page 2, line 18), "dividing the lid into two parts" (page 2, line 18), etc. Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 3-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention. For example, there is no support in the original specification for the following amended claim language: "which fits inside" (claim 1, line 3), "separating the inner cylindrical container into" (claim 1, line 5), "is not hingably attached to the kettle part and wherein the lid" (claim 1, lines 6-7), "dividing the lid into two parts" (claim 1, line 7), etc. This is a new matter rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of EP 0 63 822 A or WO 00/49924. The EP 0 63 822 A or WO 00/49924 references disclose the claimed subject matter except for such claimed structural obvious design features in order to provide simultaneous delivery of more than one type of soup at a constant and elevated temperature and in a restricted space. It clearly would have been an obvious matter of design choice to have modified either one of EP 0 63 822 A or WO 00/49924 in order to provide simultaneous delivery of more than one type of sup at a constant and elevated temperature and in a restricted space in such a manner claimed, since the invention would perform equally well. The remaining limitations would then have been obvious design choices only.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
